

Gary Bond, Pars Rural, decided that his appointment as the 4Farmers distributor for the York region was enough reason for a celebration and amongst those who gathered were (from left) Grant Humphrey, Mark Keene, Dave Wallace, Martin Joyce, Bernie Draper, Dave Fleay, new distributor Gary Bond, Terry Piper, 4Farmers Product Support, Phil Moorfield, Derek Emin and Ian Hooper

New 4Farmers distributor in York

WELL-KNOWN York local and business identity, Gary Bond, has just been appointed the new distributor for 4Farmers products in the York area, adding more competitive prices to his traditionally great service.

Gary, who trades as Pars Rural Pty Ltd, has also been a wool buyer for local WA company, Westcoast Wools, for the last 12 years, combining it with his farm merchandise company.

“Wool buying and merchandise retailing are complementary businesses” said Gary, “and the acquisition of the 4Farmers range of farm chemicals – at their very competitive prices – will help me to grow the business, which will benefit everyone.”

Gary can be contacted in York on 9641 2929 or 0427 411 019. Give him a ring and find out what you have been missing.

The winner is ...

Rob Davidson, Wagin, is the lucky winner of the football competition conducted by 4Farmers at the Wagin Woolarama and he will be heading off to Subiaco Oval to catch the AFL football action.

Tipping competition from 4Farmers

4FARMERS has decided to help footy fans demonstrate their knowledge by offering an official tipping competition for the 2007 season. If you crop more than 400ha, all you have to do is to go to the 4Farmers website on www.4farmers.com.au and log on.

There is no password, no fee to enter and no weekly prize, just the chance to

demonstrate your skill to friends and neighbours and compete for a typical “farming” prize.

The winner will receive 110L of 4Farmers Trifluralin, the runner-up will receive 20L of 4Farmers Trifluralin and both will receive bragging rights for a year.

4Farmers: The Glyphosate of choice

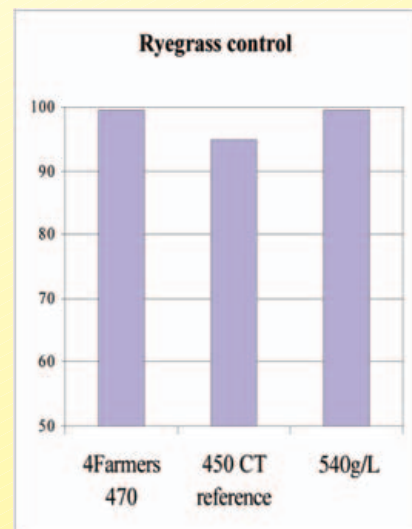

FARMERS have an almost bewildering array of Glyphosate products to choose from, with many brands and formulations on the market.

4Farmers commissioned research in an effort to reduce some of this confusion, using a 4Farmers product, a high profile brand and a middle-of-the-road product.

To ensure a fair comparison, all plots used the same amount of active constituent even though the formulations varied from 450g/L to 540g/L.

The full results can be obtained from the 4Farmers office, but in summary, there was very little difference in effectiveness between brands when the 10cm high ryegrass plants with 5-6 leaves and 3 tillers were sprayed on 9/8/2006, using 01 air induction nozzles, applying 180, 360 and 540g/L of active. The control was rated 38 days after spraying.

Some cheaper brands cut costs by reducing the wetter, while “premium” brands add little extras to the mix, but value for money shows that quality 4Farmers Glyphosate with 15% wetter is hard to beat.
