

Fenamiphos 400

Similar to: *Nemacur*[®]

Active constituent	Fenamiphos 400g/L	Formulation EC	
Typical situations	Banana and Aloe vera planting material.		
Insects controlled	Soil-borne plant parasitic nematodes.		
Chemical group	1B		
Mode of action	Systemic in plants, contact and ingestion activity.		
Typical pack size	20L		
Poison schedule 7	Dangerous goods class 6.1	UN 3018	Packing Code II
Withholding period	Harvest Not required when used as directed.		
	Grazing Not required when used as directed.		
Application method	Dipping.		Rain fastness N/A
Efficacy	Follow label recommendations.		
Compatibility	N/A		
Incompatibility	N/A		
Water quality	Unknown.		
4F Broadacre registrations	N/A		
4F Other registrations	Banana and Aloe Vera planting material.		
Similar product registrations	As above.		

Situation	Target Insects	Rate/ 100 L water	Comments
Aloe Vera (planting material)	Soil-borne plant parasitic nematodes	1 L	Allow pups to air dry or cure for 48 hours prior to treatment. Immerse pups in solution for 30 minutes following all safety precautions.
Banana (planting material)	Soil-borne plant parasitic nematodes	100mL	Remove all dead tissue from planting material and dip for 10 minutes. Allow time to drain and dry.

Comments

- Dip cannot be disposed of on site; by law, mix must be taken to a lawfully recognised disposal facility.
- **Do not** use this product for at home garden use.
- **Do not** apply to dry soil or dry grass.
- Wood ducks are particularly susceptible to this chemical use; ensure correct methods of use.
