

Farmpro 700

Similar to: LI 700®

Active Constituent	Soyal Phospholipids 350g/L and Propionic Acid 350g/L		Formulation	Water Miscible Solution
Adjuvant Group	Acidifying/Buffering Adjuvant			
Price ex GST	\$4.25/L	Typical Pack Size	20L, 110L, 1000L	
Poison Schedule	5	Dangerous Goods Class	-	UN - Packing Code -
Use	<ul style="list-style-type: none"> - Acidifier; decreases spray water pH. - Penetrant; enhances the penetration of herbicides on hard to wet weeds due to waxy or hairy surfaces, or in very cold or dry, dusty conditions. - Drift reduction; reduces spray droplet spectrum (less very fine and very coarse droplets in a given spray pattern). 			
Compatibility	Compatible with most products (avoid using alkaline products).			
Water Quality	Avoid using hard water unless treated. When using Farmpro 700 in extremely cold water some gelling may occur. Where this situation may occur consider using 4Farmers Speedy Spray instead.			
Situation	Purpose	Rate/100L	Comments	
High pH or Hard water	Decreases and holds pH at 3.5-5, prevents alkaline hydrolysis	100mL		
General herbicide use	Wetter, spreader	100 - 200mL	Can be used where applicable as a general wetter.	
Penetrant	Improves herbicide uptake on difficult to wet weeds	300 - 500mL	Can assist efficacy on waxy and hard to wet weeds (e.g. Nut grass and Couch grass).	
Difficult application conditions	Assists penetration and uptake in dry, cold or dusty conditions	500mL	Higher rates provide greater efficacy.	
Glyphosate, Paraquat and 2, 4-D application	Improves penetration and reduces hard water efficacy reduction	250 - 500mL	Assists leaf coverage and herbicide uptake.	
Comments	Do not use with SU herbicides (SU's are susceptible to hydrolysis in acidic conditions).
